### ►ATV REPEATER◄

N7ZEV Mt Potosi (8514') - Input 2441.0 FM, 434.0 AM, output 912.0 FM, all vertical polarization

### ►NOTES◄

- This list shows open, operational repeaters. However, the fact that a repeater is shown on this list does not necessarily mean that the repeater is indeed open, and the fact that a channel is shown as vacant does not mean that it is not assigned by the coordinators.
- Changes should be called in to Amateur Electronic Supply. This list is updated on a continuing basis - your assistance in corrections and additions is appreciated.
- The basic concept of this list is "Las Vegas and three hours each direction" - the fact that a repeater is shown on this list does not mean that the coverage extends into the Las Vegas Valley.
- Planning on putting up a repeater? Southern Nevada Repeater Council coordination is available at <http://www.snrc.us>.
- Clark Co. RACES/ARES membership applications at AES and <http://www.cnvares.org>.
